

Thank you for your purchase of our new LED Pod Ditch Light Kit. CAD-designed to use existing mounting points, this kit is compatible with the 2021+ Ford F-150. Basic installation instructions are included below.

Please contact us if you have any questions.

1. Working on one side of the vehicle at a time, place painter's tape across the top of the fender to prevent scratching.

2. Gently pry the rubber cowl trim piece away from the front fender and use a 10mm socket with an extension to remove the top fender bolt.

3. Install your new ditch light bracket using the factory fender bolt. Place the bracket as close to the fender as possible without touching the fender. Ensure that the top of the fender lines up well with the hood and A-pillar after install.

Remove the tape and repeat the steps on the other side of vehicle.

See back for further instructions.

4. Route the included wiring harness along the fenders, outside the hood hinge assembly and under the bracket mounting point. Secure with zip ties such that the wires cannot get caught in the hood hinge.

5. Once the bracket is mounted to the hood, refer to the Universal Bracket Info/Mounting Guide to mount your pod onto the bracket. Ensure that the hood can be opened without interfering with the pod before fully securing down the bracket.

NOTE: Do not use automatic car washes with this kit installed.

Please contact **Diode Dynamics** should you have any questions about the installation or wiring process, at **314-205-3033** (10a-5p CST) or **contact@diodedynamics.com**.
